

Anglian installed External Wall Insulation for the Housing Solutions Group to improve the thermal performance of their solid wall properties in Ellington Park, Maidenhead.

Using Rockwool's Rockshield system, Anglian applied 110mm thick dual density insulation board to the solid walls and finished them off using a Silcoplast silicon render. The upgrade reduced the U-value of the properties from an estimated 2.1W/m²k to 0.3W/m²k.

This contract follows a number of previous awards where Anglian have installed PVCu windows, loft and cavity wall insulation for Housing Solution Group to their properties in the Maidenhead area.

CONTRACT DETAILS

Client Housing Solutions Group – Maidenhead

Contract External Wall Insulation

EWI System Rockwool Rockshield 110mm Insulation board

Contract Value £171K

“The project progressed very well and was co-ordinated precisely by Anglian. Their technical advice helped improve our knowledge of the product and installation process and the completed works has helped our residents reduce their fuel bills as well as rejuvenating the properties involved by helping the aesthetics from all perspectives.”

Kevin Singh Sanghera, Project Manager for Housing Solutions Group
