

CASE STUDY

PVCu Windows and Doors

“Anglian Building Products has successfully secured an install programme for PVC-u windows and doors for the last two years and are currently working on-site delivering installs to approximately 120 traditional and non-traditional properties in the Berwick upon Tweed area. The feedback from our tenant satisfaction surveys has been positive regarding the installations and we now hope that they will benefit from reduction in fuel costs and thermal comfort.”

CARL DICKSON
SURVEYOR FOR FOUR HOUSING

FOUR HOUSING

Four Housing own and manage 5,000 properties across the North East of England, stretching from Redcar and Cleveland to Berwick upon Tweed.

Anglian Building Products secured their first contract with Four Housing in 2013. The client was suitably impressed with the work undertaken which resulted in an additional 100 houses being awarded.

Three further contracts were then successfully secured through sealed bid tenders and the total work carried out was valued in excess of £1m.

Works were carried out on two story flats and houses whilst residents were still in occupation. The residents were regularly kept up to date throughout and reassured that any disruption would be kept to a minimum.

The contracts formed part of an ambitious three year major improvements programme which have seen many properties undergo much needed repairs including replacement kitchens, heating, bathrooms and external repairs.

“I couldn’t have been more pleased, wonderful job Anglian.”

“Great bunch of workmen, very well mannered.”

“I can’t fault the workers or the job they have done, they cleaned away all their the mess afterwards, Excellent work.”

FOUR HOUSING RESIDENTS FROM HAWTHORN CRESCENT.
