SOLAR Solutions

Anglian Building products

One trusted partner, combined solutions for future ready homes.

Windows, doors and solar - planned, managed and delivered together by ABP

Solar Solutions by ABP gives social landlords and new-build partners a simpler route to warmer, more efficient homes, combining proven solar PV expertise with ABP's established nationwide delivery capability.

The benefits of one combined solution		
Simpler delivery	**Better resident experience**	**Future-ready performance**
One trusted partner reduces procurement complexity, contractor interfaces and project-management pressure.	Fewer appointments and less disruption, supported by experienced Contracts Managers, installers and Resident Liaison Officers.	A practical route to lower energy costs, regulatory compliance and progress towards net zero and Future Homes standards.

Built to deliver at scale:

- Up to 100 solar installations per week, enabled by ABP's nationwide depot, logistics and supply-chain network.
- 50 years of social housing experience, with teams skilled in working safely and sensitively in residents' homes.
- PAS 2030 and MCS accredited, bringing surveyors, installers and electricians together for a complete retrofit solution.
- Support across retrofit and new build, including collaboration with architects and designers.
- Ask us about funding options.

More efficient procurement | Faster delivery | Less disruption | Lasting value for landlords & residents.

Talk to us about your solar PV programme

Discover how ABP can combine solar, windows & doors as part of a coordinated programme for future-ready homes.
