

CASE STUDY

Window and Door Replacement

“Anglian Building Products won the contract to replace windows and doors of our 82 private resident’s apartments through their professionalism and their patience. Getting a group of residents to agree as a majority to change is always a challenge. It took 9 years to get the project signed off and ready to start. The products supplied were of excellent quality and the installation process went as well as expected. The window installation team engaged for the job were excellent. We have a group of very happy residents.”

CITY WALK RTM LTD

CITY WALKS ESTATE

PRIVATE RESIDENTS ASSOCIATION

Anglian Building Products completed a contract awarded by RTM Company Ltd, to replace windows and doors in 81 privately owned flats on the City Walks Estate in Bethnal Green, London.

The refurbishment programme included the manufacture and installation of PVCu casement windows in 2 blocks of 4 storey high blocks of flats together with aluminium communal entrance doors and entry systems. Close liaison with residents was vital as work took place whilst they remained in their homes.

Anglian assisted City Walk RTM with planning requirements; ensuring acceptable materials were used to replace the unusual pale blue timber original frames. This included taking into consideration the surrounding areas as well as the properties and the need to replace windows and doors which complimented the overall look.

Whilst the scaffolding was primarily erected to access the window, door and rainwater works, other vital maintenance works were undertaken at the same time.
