

CASE STUDY

Windows and Doors

“This contract was the first time the association had procured works under the LHC, we have found the process extremely beneficial in terms of time and cost. Once appointed Anglian have provided an efficient service from initial survey through to installation, which provided assurance to the association and allowed us to award further works to Anglian on a direct basis. This performance has been backed up by our customer satisfaction results on the projects, with the latest results showing that 95% of customers were very or fairly satisfied with the works carried out.”

CLYDE VALLEY HOUSING ASSOCIATION

A window and door renewal programme was awarded by Clyde Valley Housing Association.

Over 243 homes across North and South Lanarkshire received new tilt and turn windows and white composite doors. The initial project was secured by a mini competition held under the U9 framework agreement for LHC and then a direct award of a further 90 properties.

Anglian are an appointed company on the framework which provides its members with quality, compliant and sustainable products. Clyde Valley Housing Association residents were very satisfied with the overall quality of the work we undertook and our attitude towards their installations.

Throughout the work we ensured that they were kept fully informed at all times and that any disturbance was kept to a minimum.
