

CASE STUDY

PVCu Windows and Doors

**Powys**

POWYS COUNTY COUNCIL

Anglian Building Projects were awarded the contract to supply and install windows and doors to both geographical lots (North and South) on the Powys County Council framework agreement, Improvement Works to Council Domestic Properties.

Powys County Council is one of the largest providers of affordable rented housing in Wales, with around 5,400 properties spread over 2,000 square miles. It is also one of the most sparsely populated local authority areas in Wales.

Anglian White Knight PVC-u windows, doors and composite doors were installed to a range of property types including bungalows, houses and flats all with residents in occupation.

The 3 year contract began in 2013 and had an estimated annual value of c£800k per annum.

The framework was developed in line with the Welsh Housing Quality standard, with the aim to bring properties up to a good standard. The framework also included the replacement of kitchens, bathrooms, roofing and electrics.

“Anglian are client focussed and are always only too willing to help us. The quality, workmanship, communication and after sales has been very good. They are also tenant focussed and worked closely with our team to ensure any potential issues were overcome.”
