

CASE STUDY

PVCu Windows and Composite Doors

PICKERING AND FERENS HOMES

SOCIAL HOUSING

Anglian Building Products were awarded a contract with Pickering and Ferens Homes, for the installation of windows and doors throughout East Yorkshire.

Pickering and Ferens Homes is a Housing Association providing high quality housing for people over the age of 60 in Hull and East Riding.

Over the term of the 8 year contract, Anglian will supply and install PVCu windows, standard composite and fire rated doors to over 800 properties in 10 locations. Many of the properties will have Dual Knight windows with a rosewood finish externally and white internally.

Residents will be in occupation throughout the works so it is vital that a high standard of resident engagement is maintained, particularly as the majority of the properties are within sheltered schemes.

The contract which is valued at a total of £2.6 million was awarded through the LHC U9 PVCu Windows and Doors Framework.

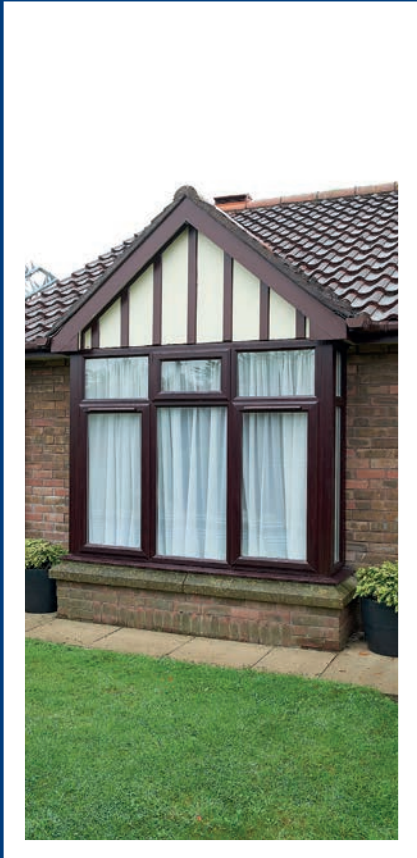

"Our residents are delighted with their new windows and doors. They have made the properties more comfortable, draught free and quieter. Thank you Anglian"

PVCu Windows and Composite Doors

“Anglian won the contract under LHC U9 Framework and we have worked closely with LHC and Pickering and Ferens throughout to deliver a high standard of resident care. It is great to see residents enjoying all the benefits of their new windows and doors, and we look forward to the ongoing delivery of the programme over the coming years.”
