

CASE STUDY

PVC-U Windows and Composite Doors

CHESTERFIELD BOROUGH COUNCIL

Anglian Building Products was awarded a contract by Chesterfield Borough Council to undertake the installation of windows and doors to their housing stock.

The project saw works to a range of property types including Reema non-traditional construction properties, in advance of an external wall insulation installation programme.

Over the term of the 14 month contract, Anglian supplied and installed PVC-U 'A' rated windows and composite doors to properties across Chesterfield. Residents were in occupation throughout the works so it was vital that a high standard of resident engagement was maintained.

The new windows and doors have been well received by the residents, who are enjoying smarter, warmer and more secure homes.

The contract valued at c.£1.6 million was awarded through the LHC U9 Procurement Framework.

"Anglian have been involved in our window and door renewal programme for over 12 months, as part of a wider multi-million investment we are making to improve the quality of the council homes that we manage for our tenants."
